8 Ton Tautliner

The curtainside Tautliner, although classified as a flatbed, looks more like a dry truck. The Tautliner is a platform with a roof, front wall and rear doors, but with open side walls, with tarps on both sides allowing easy side access for forklifts and the like.

32 Ton Superlink Tautliner

We specialise in providing you with a simplified solution for the transportation of volumetric cargo. With a superlink Tautliner you have access to more volume than can be offered by any single trailer. A superlink trailer combines a 6m trailer with a 12m trailer, offering you the maximum legal tare weight allowed for transportation on public roads in South Africa.
